

Komatsu Europe Launches New PW118MR-11 Midi Excavator

Exceptional performance in tight spaces.

Vilvoorde, October 2017 – Komatsu Europe announces the new PW118MR-11, a quick and precise “tight tail” midi excavator with a powerful EU Stage IV engine, 6% less fuel consumption and an unrivalled compactness and lifting performance.

Sturdy and stable, the Komatsu PW118MR-11 features a class-leading compact size. A special combination of power, complete control and convenient dimensions make it an ideal choice for heavy duty lifting applications or simple excavating tasks in narrow alleys, on road-construction sites and for sewer-construction work.

“This perfect match between size and performance was a focus for Komatsu designers” says Alex Visentin, Product Manager for Compact Wheeled Excavators. “It makes the machine exceptionally versatile, with the lowest fuel consumption level in its class.” He concludes: “On the European market today, no other manufacturer can guarantee such a unique combination”.

The latest KOMTRAX telematics offer top fleet management and support, protect the machine against misuse, and guarantee maximum efficiency and uptime.

Safety is further enhanced through Komatsu's standard "KOMVISION" system, and its display on the monitor of a real-time bird's eye view of the PW118MR-11's immediate surroundings. This helps to avoid jobsite incidents and accidental movement at start up.

New Features and benefits

- **Up to 6% reduction in fuel consumption** vs. PW118MR-8.
- **EU Stage IV emissions compliant** – Can work in low emissions zones.
- **New viscous fan clutch** – Less noise and higher radiator cooling efficiency.
- **6 working modes** (+1 vs. PW118MR-8). Economy mode possible even with powered attachments.
- **Auto idle shut down** – Reduces fuel consumption, increases residual value, reduces service costs
- **LED lighting package as option** for safe operations
- Control lever **Neutral Detection System** for industry leading safety – Peace of Mind
- **Increased productivity** vs. PW118MR-8 up to 6%
- **Increased maximum travel performances** - Up to 12% on the flat and 25% on 3° slopes
- Upgraded high-resolution **7" TFT-LCD widescreen monitor panel** with 25 built-in languages.
- **Height adjustable steering column.** – Ease of operation
- **New FBR (Front-Both-Rear) switch on the right lever for undercarriage** – For a faster blade/stabilizers selection
- **New FNR (Forward-Neutral-Reverse) switch** – Easier change of direction.
- **New automatic axle lock** – Operator can start working with less wasted time.
- **KOMVISION™** (Standard) - Bird's eye view of surroundings on the large machine monitor screen
- **KOMTRAX** – For your peace of mind: costs down, profits up.
