

## Meet the WB93R-5 & WB97R-5

Cutting-edge technology and maximum comfort with a great view

With the new WB93R-5 and WB97R-5, Komatsu sets new standards in comfort and performance for backhoe loaders. A completely new design ensures the highest productivity, low fuel consumption and reduced operating costs.

Featuring a new, larger cab with a rounded shape, tinted glass and one-piece rear window, the machines offer superb visibility in all directions. The rounded shape also cuts noise levels at the driver's ear. A wide range of seats are available including an air-suspension model with lumbar support. Accessories such as a powerful 12-vent air conditioning system, mobile phone charging socket and lockable storage compartment make the new loaders feel more like a family car than a working vehicle.

The car-like feeling is continued through new ergonomic instrumentation. Additionally, both models feature proportional hydraulic PPC servo controls as standard for the front loader. PPC controls are also standard for the backhoe in the WB97R-5 and available as an option for the WB93R-5. This marks a step towards the standardisation of controls across different machine types, making it easier for drivers to switch between machines.

Productivity and performance are also enhanced. The backhoe has been completely redesigned, making it easier to load high trucks and increasing lifting capacity, breakout force and digging depth. Even the layout of the hydraulic hoses has been changed to reduce possible damage due to wear. The machines include a proven front loader with parallel lifting system, which remains the best in class. Moreover, the load-sensing CLSS hydraulic system guarantees precise, simultaneous movements.

A wide range of efficient, low-emission engines meet the needs of various market segments. Customers can also choose between two 4-speed transmissions: Power Shuttle or Full Power Shift with twist grip control, standard automatic shifting and 'kick-down' function. For even greater versatility, an extensive array of optional equipment and attachments is available.

### **WB93R-5 SPECIFICATIONS**

Net power 74 kW / 99.2 HP  
Weight (kg) 7460  
Max. road speed (km/h) 40  
Max. bucket capacity (m<sup>3</sup>) 1.03

### **WB97R-5 SPECIFICATIONS**

Net power 74 kW / 99.2 HP  
Weight (kg) 7560  
Max. road speed (km/h) 40  
Max. bucket capacity (m<sup>3</sup>) 1.03
